## The Gender Gap

The \$64,000 question is: “Can women play chess as well as men?” The answer is yes and no. If we talk about pure abilities and skills, I believe there should be no reason why women cannot play as well as men. Then why aren’t there as many top-level women players as there are men?

I would like to offer my personal point of view, especially as it may apply to women’s chess in America:

1. **Cultural and Social Acceptance:** Whether we like it or not, or whether it is politically correct or not, cultural and gender bias exist in our society every day. All you have to do is look at the world of sports and you will see what I am describing. How often do you see minorities in professional tennis, golf or hockey, etc.? Not often – there are only a handful. On the other hand, what about in professional basketball, football, or baseball? These sports are dominated by minorities. Is this just a coincidence? I don’t think so.

What would parents think if boys were interested in playing with Barbie dolls and girls were interested in playing with cars, trucks or collect Pokémon cards? This is cultural and gender bias at its best. As a result, it is a problem for girls who may be interested in chess at the early age. It is generally not accepted or at least not endorsed by our society. I remember the same problem from my own experience growing up as a young female chess star. I was not well received. Many people think it was absurd for a little girl like me to play chess. As I improved and showed promise in chess as a young girl, some even went as far as to imply that I may have been forced to play chess or it was a form of child abuse. But luckily for me, I had supporting and loving parents that helped me battle many of these serious obstacles.

I believe it is a lot more acceptable now for young girls to play chess. In the schools that I teach, there are quite a number of young girls wanting to learn to play chess. This is a good trend. Unfortunately, boys still outnumber girls by a large margin.

2. **Biological clock:** Women athletes, regardless of the sport, face the same dilemma. Their bodies are created differently than men. When a woman reaches the age between 20 something to 30 something, she must ask themselves a simple question: Which is more important? To have a family or to have a long (chess) career?

So far, the choice for many top women players, including myself, has been to have a family. Unless science can discover a way for women to have healthy children anytime they wish, a woman athlete must choose one or the other. This in itself limits the longevity of any player. Therefore, it is rare to see women with as long a career as, for example, Smyslov, Korchnoi, Portisch, etc.

This is not an excuse. This is a pure fact. After bringing a child into the world, being a full-time Mom is quite a job itself. It is hard enough to be a top woman player, competing against other male professionals. It is even harder when you have to nurture your children 24 hours a day. Imagine sitting across the board from Kasparov or Karpov playing a game while thinking if your child needs a diaper change or if he/she is hungry.

In addition, women have to face a “monthly problem”. For some women, it is devastating and it can affect them very negatively. For others, it is just unpleasant.

3. **Setting standards:** For years, women have set much lower standards than men. I remember a time when no women player was above 2400. When you set low goals and expectations, chances are, the results you achieve will be very low. The problem is many women do not look at chess as a full-time profession. Many do not regard it as seriously as male players do. Therefore, the results are obvious. If you do not put in the same work, you can't compete at the same level. It is simple as that!

4. **Opportunities:** In chess, if you want to improve, one of the many things you have to do to improve is to gain experience by competing at a higher level of competition. Many girls do not have this opportunity. This adds to the dilemma. When I was growing up, my father only wanted me to compete against men. I think this is the right approach. However, to receive an invitation to an all male tournament was not an easy feat. If you look at the top women players in the world today, they all have experience playing in men's tournaments. But for the next generation, without the opportunity to compete on the same level, women simply cannot catch up to men.

5. **A numbers game:** When the number of boys who play chess at the early age is far more than girls, then purely statistically there will be more top male players than women players. If you have a hundred boys playing chess for every ten girls, what will the future bring? When the amount of young girls playing basketball and soccer increased substantially, new opportunities opened up. So the WNBA (Women's National Basketball Association) and the WUSA (Women's United Soccer Association) were born. Unless there are initiatives to change the image of chess for young girls in America and throughout the world, I don't expect to see many changes.

6. **Confidence:** When you add all of the above factors, the pressure for a young girl to succeed in this men's dominated game is incredible. When you are one of the few to reach the higher level in chess, the eyes of the world are on you. If a male player does badly in a tournament, people will say that player just had a bad tourney. But if a woman is competing in a men's tournament and does badly, people will have much more criticism. Some people just can't wait for a woman player to do badly to say she is not good or she is totally outclassed. So the pressure to succeed in the men's game is even more. Chess has a lot to do with psychology and the fear of being singled out does not help one's confidence.

So what is my conclusion? Well, I think women can compete as well as men in chess. However, if a woman wants to succeed, she must put in the same amount of work and make the same amount of sacrifices. There is no other way around it. There are no excuses and there should not be.

### **Recent Women's Event**

WorldChessNetwork.com is one of the first Internet chess servers to recognize women's chess on the Internet. Their inaugural Women's Week of Chess, a WCN exclusive event ran from August 26th - September 1st, 2002. The women who participated competed in Banter Chess and Master Challenges each and every evening throughout the event! There were multiple daily events featuring female chess stars like WGM Martha Fierro, WIM Nava Starr, WIM Natalia Khoudgarian and me.

The young Canadian sensation IM Pascal Charbonneau, 2002 Canadian Champion and Canadian Open Champion, also was on hand taking part in various activities.

This is the first time I have played public competition other than blitz and simuls since 1997. The reason why I agreed to do this

event is because of the names such as Bill Church, Dato' Tan Chin Nam, Yasser Seirawan etc. Since these people have done so much for chess, I wanted to show them my appreciation and support.

To be honest, it was strange to play in this event after such a long hiatus. I must say I am quite pleased with the final result, considering I did not prepare for it.

The stars of the events were:

### **WGM Martha Fierro**

A four time Pan-American champion, Martha Fierro hails from Ecuador. She was the winner of a silver medal at the 1996 Chess Olympiad in Armenia where she played first board. Martha became a WFM in 1994, a WIM in 1995, and WGM in 1997. She currently teaches chess to children in Charlotte, North Carolina where her students are state champions.

### **WIM Natalia Khoudgarian**

Originally from Moscow, Natalia started playing chess at the age of 7. In 1989 she became the under-21 Moscow women's chess champion and that same year took third place in the under-21 USSR women's championship. 1992 saw Natalia take third place in the Moscow women's championship. Natalia graduated from the Russian State Academy of Physical Education with a diploma in Teacher of Physical Education and Coach of Chess. Natalia arrived in Canada in 1995 and took top honors at the Canadian Open Women's Chess Championship. She played second board at the 1996 Chess Olympiad.

### **WIM Nava Starr**

Nava's resume speaks for itself. She is a true Canadian superstar. Nava Starr is an 8-time Canadian Women's Champion (1978, 1981, 1984, 1986, 1989, 1991, 1995, 2001).

Nava also won a Gold medal on Board 2 for Canada in the 1976 Olympiad as well as a Bronze medal on board 1 in the 1982 Olympiad.

**Day 1: WGM Martha Fierro (*Olympics Silver Medalist, 96*) 0 – 1 GM Susan Polgar**

**Day 2: GM Susan Polgar 1 – 0 WIM Nava Starr (*9-time Canadian Women's Champion, winner of 2 Olympics medals: Gold, 76 - Bronze, 82*)**

**Day 3: GM Susan Polgar 1 – 0 WIM Natalia Khoudgarian (*Moscow women's under-21 champion 89*)**

**Day 4: WIM Nava Starr 0 – 1 GM Susan Polgar**

**Day 5: WGM Martha Fierro ½ – ½ GM Susan Polgar**

**Day 6: GM Susan Polgar 1 – 0 IM Pascal Charbonneau (2002 Canadian Champion & 2002 Canadian Open Champion)**

**Day 7: WIM Nava Starr 0 – 1 GM Susan Polgar**

**Day 7: GM Susan Polgar 1 – 0 World Chess Network (members vote on the moves)**

**Final score: Susan Polgar 7½/ 8**
